Welcome OBAGI!

Our office is pleased to announce the arrival of Obagi Medical Products! Obagi has many wonderful products, but let me touch on a few you can find at our office today.

First, we welcome Obagi ELASTiderm™, a fabulous eye cream that's clinically proven to help restore the elasticity of the delicate skin around your eyes and reduce visible fine lines and wrinkles. But what makes it work? Well, it's a combination of a

**ELASTiderm™**

Bi-mineral Complex that replenishes elastin and builds collagen, Malonic Acid which helps stimulate production of healthy skin cells, Blueberry Extract which provides antioxidants that

help eliminate free radicals and Penetrating Therapeutics™ a patented Obagi technology that helps drive ingredients deep into the skin.

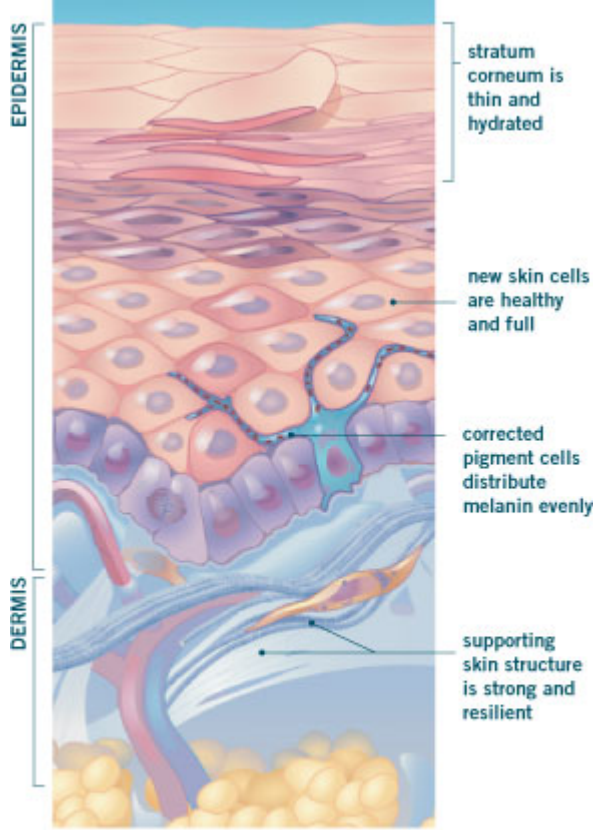

Do you suffer from acne? We have a wonderful new product for you! Obagi CLENZiderm M.D.™ is a penetrating acne therapeutic system. The simple three-step system will visibly reduce acne as early as 2 weeks. Not only is CLENZiderm M.D.™ easy to use, but it is effective,

**CLENZiderm M.D.™**

even without the use of antibiotics. This state-of-the-art acne system is formulated with proven acne-fighting ingredients, including the star player, a patent-pending, penetrating formula of 5% benzoyl peroxide. Unlike other benzoyl peroxides, it penetrates the pores all the way down to the follicles – to stop acne where it starts. We carry this product in Normal to Dry Skin and Normal to Oily Skin allowing teenagers, 40+, and everyone in between to be treated with the same breakthrough technology.

If you have been looking for something to rejuvenate your skin, Obagi Condition and Enhance System is just the answer. This combination of products is designed to transform your skin and help correct hyperpigmentation, moderate to severe photodamage, fine lines and wrinkles, laxity, and acne. The prescription-based System triggers a therapeutic cascade at the cellular level that makes your skin look and act younger and healthier. This product is amazing in itself, however paired with a laser procedure such as Photo Genesis (for photodamage), your results will be amazing and your skin will have never looked better.

## Showing the Therapeutic Cascade

Obagi Condition and Enhance does require a commitment to your skin and your skincare regimen. It's not for everyone; however within my first week of using the Obagi Condition and Enhance, I have found it much easier to work the multi-step process into my life than I anticipated. A couple of steps in the morning, and a couple of steps at night; that's all it takes. More commitment is required to stick with the process of transformation as your skin goes through many stages over many weeks. But when you see your results, you'll know it was worth it! Do you believe in transformation? You will.
